

Whole-building LCA in US practice: interviews with 46 building designers

20 architects · 20 structural engineers · 6 sustainability consultants

Institutions drive adoption

Any institutional motivator

Green building certification

Commitment program

Government policy

Where practice breaks down

Inaccurate embodied carbon data

BIM / quantity takeoff friction

Unreliable results

Biogenic carbon assumptions unclear

Appetite for advanced LCA

Want to learn more

Find probabilistic LCA appealing

Could adopt probabilistic LCA

Could adopt dynamic LCA

...despite 67% never having heard of it

Bars show the share of the 46 participants who raised each topic unprompted; each count is a lower bound, not a survey response rate.
